Asking Price: 485.000 € UK Tax paid

Your Next Adventure Awaits

The Windy Chinook 46 is a benchmark in the premium performance cruiser segment, combining unmistakable Scandinavian design with exceptional seaworthiness, build quality, and driving pleasure. Designed for owners who appreciate understated luxury and confident offshore capability, the Chinook 46 delivers an outstanding balance between comfort, performance, and elegance.

Privately used and meticulously maintained, the yacht presents in excellent condition and is fully prepared for immediate enjoyment.

The yacht is available for viewings by appointment in Calvia, Mallorca.

Turn-key and ready to go, this Windy Chinook 46 represents a rare opportunity to acquire a timeless performance cruiser in outstanding condition.

Exterior Elegance & Functional Design

The Windy Chinook 46 impresses instantly with her powerful stance, clean lines, and deep-V hull - an iconic Windy signature renowned for superior seakeeping and comfort at speed. The hull design ensures outstanding stability and confidence in a wide range of sea conditions, making her equally suited for fast passages and relaxed coastal cruising.

The Foredeck

Forward, a generous sunbathing area creates an inviting retreat at anchor, offering both comfort and open-air relaxation. Safe access and well-designed deck ergonomics ensure effortless movement around the foredeck, while the uncluttered layout enhances the sense of space and freedom onboard. The electrically operated anchor winch adds both convenience and safety, controllable either via dedicated foot-push buttons at the bow or directly from the helm station, complete with a chain counter for precise anchoring in all conditions.

The Cockpit

The cockpit is the true social hub of the yacht and has been meticulously designed to offer exceptional comfort both at anchor and underway. Generous seating, excellent wind protection, and a well-balanced layout create a refined yet highly functional space, ideal for entertaining or relaxing throughout the day.

An electrically operated sliding sunroof allows the cockpit to be effortlessly opened or closed, adapting instantly to changing conditions, while the aft enclosure provides additional protection and extends the usable season. The fully equipped wet bar, complete with fridge, ice maker, BBQ, and sink, makes hosting on board effortless, complemented by a foldable cockpit table that enhances flexibility for dining or lounging. A high-quality sound system completes the experience, ensuring an inviting atmosphere for long, enjoyable days on the water.

At The Helm

The helm station is a true highlight of the Windy Chinook 46, combining a sporty, driver-focused layout with exceptional ergonomics and visibility. The electrically adjustable helm seat ensures optimal comfort and control in all conditions, while a large Raymarine touchscreen chartplotter provides clear and intuitive navigation. Performance and handling are further enhanced by dedicated displays for the Humphree interceptor system and Seakeeper stabiliser, allowing precise control and monitoring at all times.

Volvo Penta engine controls, including joystick manoeuvring, bow thruster control, and autopilot, make close-quarter handling effortless and inspire confidence underway. All essential onboard systems—lighting, pumps, and auxiliary functions are conveniently operated via easy-access push buttons, keeping the helm clean and uncluttered. The experience is completed by integrated sound system controls, three comfortable companion seats, and a sliding side window that provides direct access to fresh air and docking communication, creating a helm environment that is as refined as it is exhilarating.

The Bathing Platform

The bathing platform is generously dimensioned and exceptionally well equipped, designed to enhance both leisure and practicality on board. Large enough to accommodate a Williams 285 jet tender, it features a hydraulically submersible platform that allows effortless launching and recovery of the tender, as well as safe and convenient access for swimmers. A stainless-steel swim ladder and integrated freshwater shower further enhance comfort after time in the water. In addition, three spacious storage lockers are incorporated into the platform area, providing ample space for watersports equipment, toys, and onboard gear. This thoughtfully engineered platform transforms the stern into a true waterside living area, perfectly suited to an active and relaxed Mediterranean lifestyle.

The Interior

Access to the interior is via a glass door from the port side of the cockpit, creating a seamless transition between outdoor and indoor living. Stepping below, you are welcomed into a comfortable and inviting salon, filled with natural light and designed for both relaxation and practicality. To port, a well-proportioned galley is fully equipped with a stove, oven, sink, and refrigerator, complemented by ample storage, making it perfectly suited for extended stays on board.

On the starboard side, a comfortable sofa accommodating up to four guests creates a relaxed lounge area, complete with a television for onboard entertainment. The intelligently arranged layout provides easy access to the day head, as well as to the two aft guest cabins and the master cabin forward, ensuring excellent flow and privacy throughout the accommodation spaces. Large hull windows flood the interior with natural light and offer beautiful sea views, while the air conditioning ensures a pleasant onboard climate in all conditions. The result is a refined yet welcoming interior that perfectly balances comfort, functionality, and Scandinavian elegance.

The Master Cabin

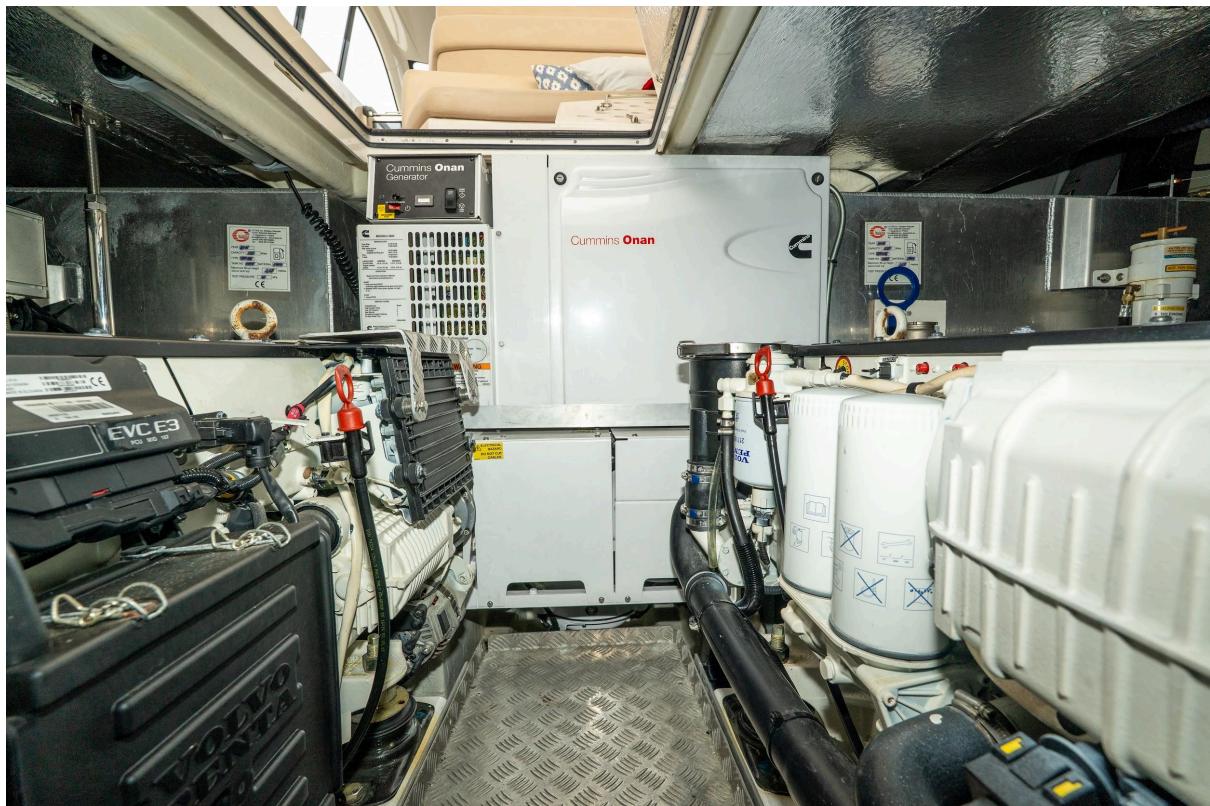

The master cabin offers a tranquil owner's retreat, featuring generous proportions, excellent storage, and a private ensuite bathroom, all designed for extended stays in complete comfort.

Two additional aft cabins provide equally well-appointed accommodation for guests or family, ensuring privacy and practicality without compromise. A conveniently located day head serves guests during the day, seamlessly integrating functionality with elegant design.

The Engineroom

The engine room of the Windy Chinook 46 reflects the brand's renowned commitment to engineering excellence and long-term reliability.

Designed with both performance and serviceability in mind, it offers well-organised systems, clean installation, and excellent access for inspection and maintenance. High-quality components, robust construction, and thoughtful layout ensure dependable operation and peace of mind, whether cruising locally or undertaking longer passages. This technical space underscores Windy's reputation for building yachts that are not only a pleasure to drive, but also practical and confidence-inspiring to own.
